

(a) Stepwise ablation delta matrix relative to A1

(b) Classification and continuity gain decomposition

(c) Progressive accuracy-smoothness trajectory

A1	Raw head reference
A2	Fine-state supervision class +0.000; Smooth +0.004
A3	Ordered prior class +0.000; Smooth +0.003
A4	Probability fusion class +0.000; Smooth +0.003
A5	Ordered inference class -0.014; Smooth +0.010
A6	Final balance class -0.003; Smooth +0.005

(d) Observed component contributions
